

Already have a different system in mind?
We can install it for you!

Industry Specific Benefits:

Automotive Care:

*Did that car have that dent when it showed up?
Did it have a dent when it left the shop?*

Record all cars while they are in the shop. If customers later claim that damage was caused by the shop, the footage can be reviewed.

Daycare:

*Who is visiting and watching?
Would parents like to watch their child while at work?*

Parents can be granted remote access to designated area (playground for example) or all cameras on a user name basis. Up to 1,000 user accounts can be created with expiring passwords. If the parent enrolls their child for two months, the password can be set up to automatically expire in two months. User logins can be tracked to see who is logged in when.

Food Service:

How did that staple get in the food?

Place cameras to view all deliveries through processing and sale, as well as in the dining area.

Hourly Professional Service: (law office, CPA, etc.)

For how long was the client here last week?

See at what time clients walked in the door and at what time they left. Ensure no billing errors or disputes.

Parking Lot:

How did the dent get there?

Was that today?

Leaving the office late again?

Is there anybody out there?

Place a camera to view your vehicle. See if there is anybody out there before you head out to your car.

It is all possible with CCTV.
Today's CCTV Surveillance systems can help you in ways you had never considered or imagined before.
To learn how, please contact us for a free quote. 916.983.1661

Residential:

Is the garage door shut?

Is the side gate shut?

Are the children clear of the pool area?

Are your children playing safe on the trampoline?

Or in the sandbox?

Did the children make it home after school?

Is the babysitter good with the children?

Did that package/dry cleaning arrive yet?

At what time?

What was that noise outside?

Did the cat knock the trashcan over?

Or did the person knocking over the trashcan scare the cat?

Cameras can be placed around the entire perimeter of your house. All activity can be viewed day or night; see in complete darkness with night vision cameras. Covert "nanny cams" can be installed to check on babysitters. See your children on your PDA cell phone while at dinner or your PC while at work. Place cameras in the following places: Front Door, Garage, Pool Area, Crib, Trampoline, Sandbox, Driveway, etc.

Retail:

How many customers entered your store today?

At what time did they come?

For how long did they stay?

Did all customers receive their orders?

Did the customers get charged correctly?

Is your location safe at night?

Where did that missing package go?

Are employees working in a safe manner?

Who wrote that bad check?

Why did someone fall?

Was it neglect on your store's part?

(See other side of this flyer for solutions)

Warehouse/Stockroom:

Are the forklifts being operated in a safe fashion?

Is all material stored safely?

How many boxes did we load onto the customer's truck two weeks ago?

How did he manage to end up under that heavy box?

Was he limping when he came in today?

Place cameras throughout the plant to be able to spot safety concerns from your office immediately. Capture all packages and material as they are delivered and picked up.
